

# Cybersecurity Training For the lift & escalator industry

## 1-DAY LIVE TRAINING

Are you working in the lift, escalator or safety component industry? Don't miss this training on cybersecurity – a perfect fit for a combined visit to the Interlift Expo in Augsburg that same week. Become updated on all the important questions about this theme.

### WHAT YOU WILL LEARN:

- The risks of IoT in lifts, escalators, and safety components
- Standards and laws concerning cybersecurity
- How to work towards a cybersecure lift, escalator, or safety component
- Best practices for cybersecurity in lifts

### ABOUT THE TRAINER:

**Tijmen Molema** is a certification specialist at Liftinstituut with a focus on cybersecurity and functional safety. His expertise lies in software, with five years of experience in developing reliable systems for environmental research. At Liftinstituut, he uses his skills to ensure safety in the field of vertical transportation. With a background as a research engineer and developer, he excels in guiding projects from inception to successful fruition.

### TRAINING DETAILS

- Duration: Full day (8 hours)
- Date and location: October 16, 2023  
Hilton Munich Airport Hotel, Germany
- Maximum number of participants: 15

### KEY TOPICS

- Cybersecurity EU Directive, Laws and Manufacturer Obligations
- Cybersecurity Standards and Basis for Certification
- Lifecycle of cybersecurity
- IoT in lifts
- Defense in depth
- IEC 62443 requirements for lift components
- ISO 8102-20 (cybersecurity for lifts)

**REGULAR RATE** EUR 990

**EARLY BIRD RATE** EUR 790

Early bird rate is valid until September 15, 2023. Rates include program materials, lunch, snacks, and beverages. Other expenses (i.e. travel fare, hotel room, breakfast, & dinner) are excluded.
