Cybersecurity Training
For the lift & escalator industry

1-DAY LIVE TRAINING

Are you working in the lift, escalator or safety component industry? Don't miss this training on cybersecurity – a perfect fit for a combined visit to the Interlift Expo in Augsburg that same week. Become updated on all the important questions about this theme, including best practices in the lift and escalator industry.

WHAT YOU WILL LEARN:

> The risks of IoT in lifts, escalators, and safety components

> Standards and laws concerning cybersecurity

> How to work towards a cybersecure lift, escalator, or safety component

TRAINING DETAILS

> Duration: Full day (8 hours)

> Date and location: October 16, 2023 Hilton Munich Airport Hotel, Germany

> Maximum number of participants: 15

KEY TOPICS

> Cybersecurity EU Directive, Laws and Manufacturer Obligations

> Cybersecurity Standards and Basis for Certification

> Lifecycle of cybersecurity

> IoT in lifts

> Defense in depth

ABOUT THE TRAINER:

Elena Mauro is a certification specialist at Liftinstituut, specializing in cybersecurity and functional safety. With a background in safety consulting and 13 years of experience at a safety systems supplier, she now focuses on certifying lifts, safety components, and machines. Elena studied Process Engineering at Eindhoven University of Technology and completed a post-Masters in System Engineering there.

REGULAR RATE	EUR 990
